SKILLS

Languages: TypeScript | JavaScript

Front-end: React | React Native | Next.js | ShadcnUI | TailwindCSS | MUI | Storybook

Backend: Node.js | NestJS | Next.js | Directus | Appwrite

Others: AWS | React Query | Zustand | Playwright | Jest | SQL

Tools: GitHub | GitLab | Jira | Confluence | Monday.com

EXPERIENCE

Software Engineer

December 2024 - Present

- **CliniGuide** | Montreal, Canada
 - Designed and implemented core product features for an AI-assisted healthcare application that helps physicians see clearer, make faster & more informed decisions using patient data and health records.

Software Engineer

August 2024 - January 2025

- **Silverstein Properties** | New York, United States
 - Contributed across 6 production codebases spanning frontend and backend systems supporting enterprise tenant experiences for major clients including Spotify, Uber, Duolingo, and Disney.

Software Developer

September 2023 - August 2024

- **Real Dev Labs** | Montreal, Canada
 - Built & maintained a customized UI component library.
 - Contributed to 5 development projects (frontend & backend).

Software Developer

April 2023 - August 2023

- **Silverstein Properties** | New York, United States
 - Completely rebuilt the entire website & deployed a customized CMS for the World Trade Centers (SilversteinProperties.com) using cutting-edge technologies: TypeScript, Next.js, Material UI, Directus, PostgreSQL, and AWS.

Front-end Software Developer

May 2022 - August 2022

- **Microsoft** | Montreal (internship)
 - Contributed to and maintained a component library that was used in 3+ business applications at Nuance and Microsoft.
 - Created & improved unit tests for 50+ components of an internal micro frontend framework.

Software Testing Engineer

May 2021 - August 2021

- **Nuance Communications** | Montreal (internship)
 - Followed BDD principles, created & maintained automated tests in Python utilizing Pytest + Splinter. Reduced 70% of failed tests per build. Found & reported a total of 98 defects in DEV + QA + PROD.

PROJECTS

Founder & Developer

- **Visual Dictionary** | visualdictionary.co/
 - Built a visual-first dictionary platform using Next.js, TypeScript, and PostgreSQL to help learners understand concepts directly without relying on translation. Designed the product, frontend architecture, and core learning experience end-to-end.

Founder & Developer

- **Tapto.menu** | tapto.menu/
 - Built a QR-based digital menu and ordering platform that lets diners browse menus and submit verified order intent without installing an app. Developed the product end-to-end, including frontend flows, restaurant-facing logic, and mobile-friendly UX.

Founder & Developer

- **Day in the life of** | dayinthelifeof.us/
 - Built a time-awareness web app that helps users visualize how daily activities affect meaningful time. Designed the product concept, UX, and implementation as a solo founder-developer.

EDUCATION

Bachelor of Software Engineering

- **Concordia University**
Montreal, QC • 2023
